

DEV VERMA

Software Development Engineer | Full-Stack & AI Systems

📞 +91 9105042180 ✉ devverma2031@gmail.com 🌐 devverma.dev 🔗 [LinkedIn.com/in/devxml](https://www.linkedin.com/in/devxml) 🐙 [GitHub.com/devxml](https://github.com/devxml)

SUMMARY

Software Development Engineer specializing in full-stack development, REST APIs, and scalable backend systems. Experienced in building production-ready applications using Next.js, Node.js, PostgreSQL, Docker, and AI-driven architectures. Strong foundation in Data Structures, system design fundamentals, and real-world problem solving.

WORK EXPERIENCE

Software Development Intern – Trackon Couriers

Feb 2026 – May 2026

- Designed a **role-based shipment tracking dashboard** using **React, Node.js, Express.js** and **MongoDB**, replacing manual spreadsheet tracking for **500+ records**.
- Developed secure **REST APIs** for shipment management with **JWT authentication**, pagination, and validation.
- Optimized **MongoDB schema and indexing**, reducing shipment lookup time from 5 minutes to under 20 seconds — a **93% improvement**.
- Reduced manual data-entry errors through server-side validation and structured logging by **~70%**, improving data accuracy.

PROJECTS

CODEPILOT – Talk to Your Codebase (AI) | *Next.js, Node.js, Express.js, Prisma, PostgreSQL, Docker*

- Built a **5-agent LangGraph RAG workflow** using **real-time repository chat** and code analysis across repositories with up to **500K+ LOC**.
- Developed **authentication**, workspace management, and repository APIs using **Node.js, Express, and Prisma ORM**.
- Indexed and analyzed over **10M+ lines of code** from GitHub and ZIP repositories using **FastAPI** ingestion endpoints and vector embeddings.
- Generated repository reports with **security findings**, API inventory, architecture diagrams, and code insights.
- Optimized RAG pipeline with Sentence-Transformer embeddings, achieving **sub-50ms p95** retrieval via **Pinecone**.

Job Alert Automation Bot | *Node.js, Express.js, PostgreSQL, Redis*

- Built automated job aggregation and alert platform using node-cron and Telegram Bot API, integrating **7 ATS providers** and **4 aggregators** to process **30,000+ postings per scan**.
- Modeled PostgreSQL schema for **100,000+ company** records, job metadata, and duplicate-free notification tracking.
- Designed a configurable filtering pipeline using keyword, location, experience, and relevance scoring, eliminating **95%+ irrelevant postings**.
- Integrated **Redis caching** for API responses and data, reducing redundant calls and improving scan performance by **50%+**.
- Implemented concurrent API fetching with retry logic, timeout handling, and rate limiting, cutting scan time by **60%**.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C/C++

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Databases: PostgreSQL, MongoDB, MySQL

AI/GenAI: LLMs, LangGraph, RAG, AI Agents, Vector Search

Cloud & DevOps: AWS, Docker, Git, CI/CD(GitHub Actions)

Core CS: OOP, DSA, DBMS, Operating Systems, Computer Networks

EDUCATION

B.Tech – Computer Science and Engineering

2022 – 2026

Sanskriti University, Mathura

CERTIFICATIONS

- Generative AI** – Microsoft
- NPTEL Certifications (IITs) - Data Structures & Algorithms, Python**

ACHIEVEMENTS

- Solved **300+ Data Structures & Algorithms problems** across LeetCode and GeeksforGeeks.
- Won **2nd place** at the **Spark Hackathon**, competing among **50+ teams** for innovative technical solutions.
- Awarded “**Best Project**” at **Sanskriti University’s tech fest 2025** for innovation and technical excellence.
